

Engineers - Surveyors - Planners  
Environmental Scientists

## Please ensure your Alternative Onsite Sewage System (AOSS) is in compliance with State Health Department Regulations:

State-wide regulations became effective December 2011 that require the owners of AOSS's to have their system operated & maintained by a licensed operator.

Greenway Engineering has certified AOSS staff and a Virginia certified, in-house laboratory that can assist property owners in maintaining compliance with all state regulations.

Greenway provides an un-biased and independent environmental inspection and will not recommend unnecessary changes or repairs.
